

# GRATES AND LINEAR DRAINS

[Click to enlarge image \(Opens in new window\)](#)

Grates designed by FLORA are made of AISI 316 polished stainless steel and cut using a high precision laser, to fit into the siphon's corresponding housing. This grate provides the distinguishing finishing touch which characterises our shower trays. There are different types of grates depending on the shower tray model.

## SPRING

The same texture and colour as the tray.

Exterior measures:  
351 x 30 x 3 mm.

## LIMITE

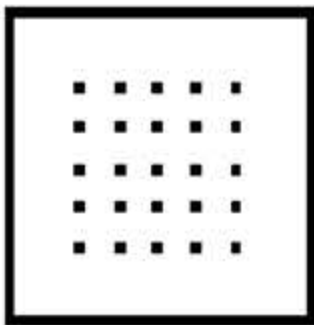

The same texture and colour as the tray.

Exterior measures:  
351 x 30 x 3 mm.
